2. **Fuel Management:** With real-time tracking, businesses can monitor fuel consumption and identify any anomalies. This can contribute to better fuel management practices and cost savings and ensure fuel theft.

4. **Geo-fence:** The customer can create a geo-fence to identify whether the Vehicle reached/left on time.
5. **Reduce delays and time spent at unauthorized locations:** With GPS software, you can establish and track an alert system for events like a driver going outside of a designated area or staying idle for too long. A digital log of routes and monitoring stops is key to determining whether your fleet is running efficiently.
